Take Video Further With Vbrick When You Import From Box

With Vbrick, you can take video files stored in Box and turn them into enterprise-ready assets. Import videos into Vbrick's enterprise video platform (EVP) to leverage built-in AI that streamlines publishing and makes videos easier to search, understand, and share across the platforms your teams, customers, and partners rely on every day.

WHY VBRICK?

Vbrick gives you the power to do more with video.

|			
A single platform for all your live and on-demand video across departments, use cases, and audiences	AI-powered features that boost discoverability, engagement, and accessibility — right within the video player	Enterprise-grade security, compliance, and governance controls built on a scalable architecture	Out-of-the-box integrations and APIs for adding videos where work happens

HOW IT WORKS

Step 1: Import From Box

Pull videos directly from Box into Vbrick using the upload tray.

Quickly upload your videos from Box

Step 2: Enrich Using Vbrick AI

Enhance the user experience through searchable and accessible video content.
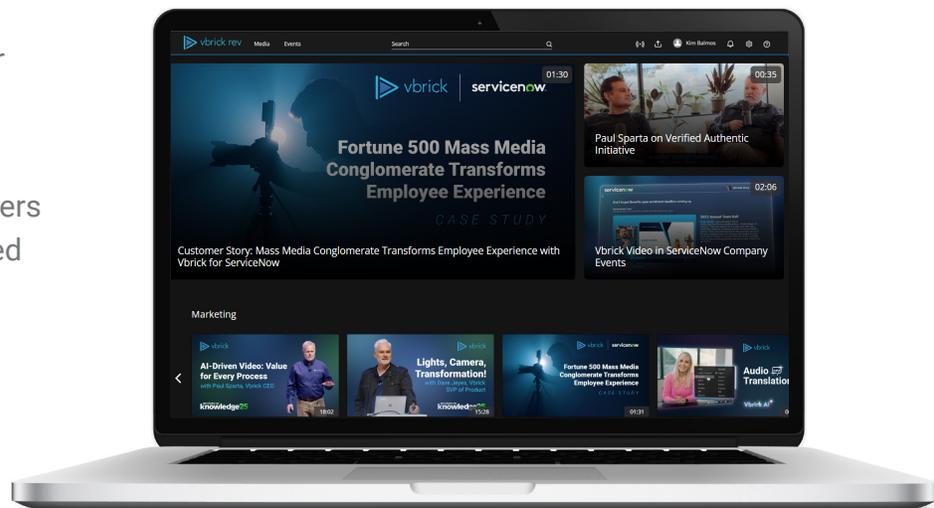

- ◉ Generate titles, tags, descriptions, and chapters in just one click
- ◉ Chat with the video assistant to extract key takeaways and insights in seconds
- ◉ Add transcripts, translations, and subtitles in 100+ languages

Preview summaries and descriptions

Search transcripts and pinpoint speaker segments

Chat with a video assistant

Browse chapters

Step 3: Publish Anywhere

Share and manage videos securely through your own branded video portal or across the tools your teams and customers use every day.

- ◉ Embed into portals, intranets, and other enterprise applications like Salesforce, ServiceNow, and more
- ◉ Surface relevant videos and guide viewers to moments that matter with AI-powered discovery tools
- ◉ Use channels, categories, and playlists to organize by team, topic, or initiative
- ◉ Enable subscription notifications to keep users updated and informed

Organize videos in your own branded portal
