# Create and Access Your Video Content With the Touch of a Button — Anytime, Anywhere

Empower your workforce like never before, no matter where they work, with the ability to create and access all your video content right at their fingertips. Vbrick Mobile makes information sharing even easier, enabling users to effortlessly view, upload, and capture content using their mobile devices. This all-in-one platform not only centralizes your video assets for easy access but also allows users to actively engage with and contribute to your organization's video ecosystem.

Search across your video library and watch videos on demand

Securely capture videos within the app or upload mobile recordings in just a few clicks

Available for both iOS and Android platforms

Highlight your must-watch videos on a carousel of featured content

Explore content across various categories and channels

Streamline Video Creation and Access – Download Vbrick Mobile Today!

GET IT ON Google Play

Download on the App Store

CONFIGURABLE OPTIONS FOR YOUR ORGANIZATION'S UNIQUE NEEDS

BRANDED EXPERIENCE

When users log in to create, watch, or upload videos, they'll enjoy the same branded experience as your Vbrick instance — complete with your custom settings, branding, logo, and accent colors.

AVAILABILITY AND CONFIGURATION

Vbrick Mobile is available to all Vbrick cloud customers.

To utilize the mobile app, users must have an active account and valid email address associated with your organization's cloud-hosted Vbrick tenant.

Live webcast streams require a desktop or a web-based tenant. However, users can watch a live webcast on their mobile devices using a mobile app browser.

FLEXIBLE SECURITY AND COMPLIANCE SETTINGS

We understand that every organization has unique security and compliance requirements. To cater to these needs, Vbrick Mobile offers customizable settings. You can tailor the application's configuration to align with your specific security protocols.

Access Enabled by Default
By default, access to Vbrick Mobile is enabled. To disable access, follow these steps:

- Go to **System Settings**.
- Navigate to **Security**.
- Click on **Rev Mobile App Settings**.
- Uncheck **Enable**.

Managing Login Timeout
Set an inactivity timeout to enhance security to determine how long a session remains active without user interaction.

Flexible Video Recording Options
Users can choose between uploading pre-recorded videos or utilizing in-app video recording for an added layer of security.

SEAMLESS ON-THE-GO VIDEO VIEWING AND RECORDING – NOW IN ONE CONVENIENT APP!
