

Vbrick Mobile

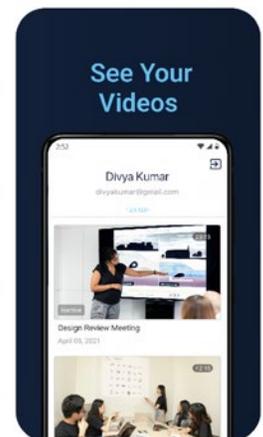

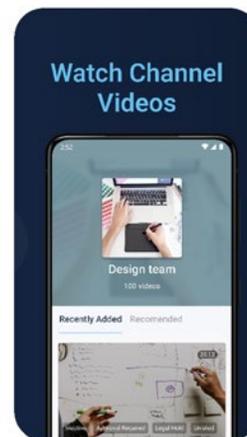

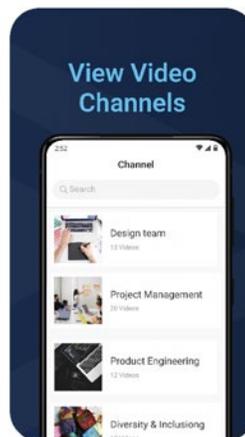

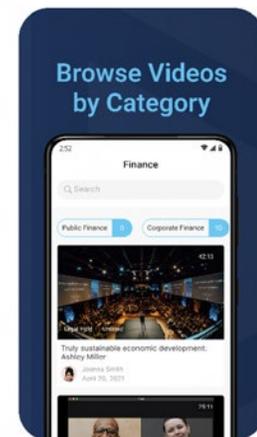

When employees are on the go or working between their homes and office, making videos more accessible helps keep them informed and engaged. With Vbrick Mobile, information sharing is even easier. Now users can view and upload recorded videos from anywhere on their mobile device.

KEY FEATURES

Our mobile app for on-demand video playback provides the ability to search for videos, browse channels and categories, and upload videos from Android or iOS devices.

- Watch on-demand videos
- View a carousel of featured videos
- Browse feeds of recommended and most recent content
- Search for videos
- Scan categories and channels to find videos of interest
- Upload videos captured on your mobile device (media contributors only)

Note: Users can join live webcasts using their web browser.

BRANDED EXPERIENCE

Vbrick Mobile extends our enterprise video platform by placing it in users' hands. When they log in to view or upload videos, your custom settings, including branding, logo, and accent colors, are all displayed in the app.

ACCESS AND SECURITY

Vbrick Mobile is available to all Vbrick cloud customers. Users must have an active account and email address in their company's cloud-hosted Vbrick tenant to use the app.

Settings for the app can be adjusted based on your security and compliance requirements. Access to Vbrick Mobile is enabled by default. To disable it, go to System Settings>Security>Rev Mobile App Settings. You can also set the inactivity timeout by choosing how long a session is considered active.

REV MOBILE APP SETTINGS	
Mobile App Access	<input checked="" type="checkbox"/> Enable
Mobile Inactivity Timeout (in days)	<input type="text" value="30"/> *
<small>Enter the max number of days up to 365 that a user can have an active session in the mobile app after last login. 0 indicates no timeout</small>	

DOWNLOAD VBRICK MOBILE

Vbrick Mobile is available for download
in the Apple Store or Google Play.
