

Active User Pricing Sheet

Vbrick Rev makes it easy to conduct live streaming events to reach large audiences and gives you a single, secure portal to store, access, and surface video on demand. What's not so easy to know is exactly how many people will be viewing those live and recorded videos. Vbrick offers flexible options to handle the highs and lows, taking the guess work out of the equation. You only pay for what is used – no more managing licenses or limiting access. Bundles of viewing hours are purchased separately and can be increased as they are consumed.

MONTHLY ACTIVE USER

- Provides unlimited number of employee accounts
- Allows unlimited viewing of live and on-demand video
- Sets price based on estimated peak of unique users logging in during any calendar month
- Reports regularly on usage – consistent coverage requires true up
- Includes flexibility to deploy as many DMEs and Rev Connect peer meshes needed to adapt to growing and changing networks

ADD ONS

VIEWING HOURS – Purchase in bundles for public webcasts or viewing video embedded on public website

STORAGE – Get an additional terabyte of storage and associated transcoding per year

REV IQ – Purchase credits that apply to transcription, translations, and user tagging
