

# Vbrick Enterprise Video for Learning and Development

Enterprise learning doesn't live in one place. It spans learning management systems/learning experience platforms (LMS/LXP), workflow tools, onboarding journeys, and the systems employees use every day. But these often siloed environments don't support sharing and integrating video content — the most effective way to teach, explain, and reinforce — creating a disjointed experience for viewers and admins.

Vbrick solves that by acting as the secure, unified video layer that extends your current learning investments without forcing teams to change how they work.

## USE VIDEO ACROSS ANY LMS

With Vbrick, it's easy to bring high-quality video into existing learning management and experiences platforms.

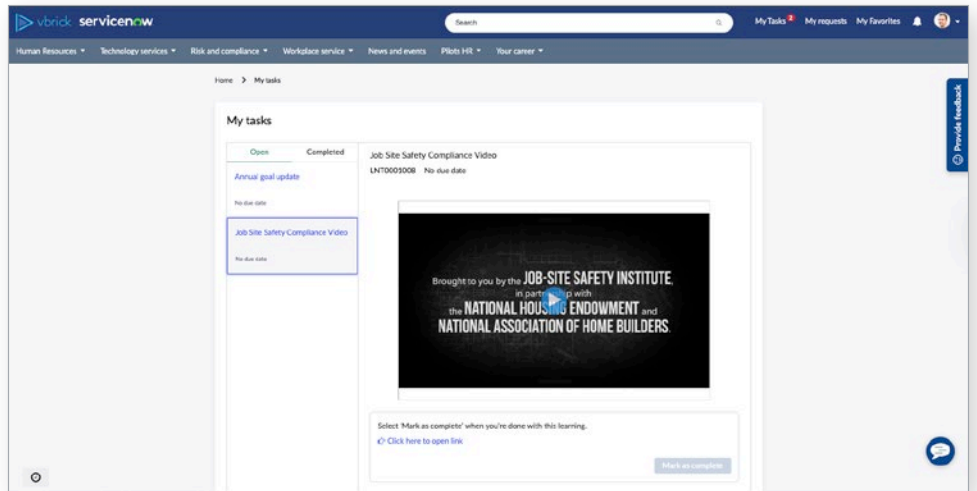

Training teams can package Vbrick-hosted videos using SCORM 2004 and publish them into systems like Cornerstone or SuccessFactors, avoiding re-uploading or managing the same video across various learning systems.

A screenshot of a learning management system (LMS) interface. The top navigation bar includes 'Your site', 'Home', 'Dashboard', and 'My courses'. A sidebar on the left shows a menu with 'General', 'Introduction', and 'Deepfake Protection'. The main content area displays a video player for a course titled 'How to Protect Yourself from Deepfakes'. The video player shows a man in a dark blue shirt speaking. The video title is 'How to Protect Your Business from Deepfakes: Detection, Prevention and Employee Education Strategies'. The video player includes a progress bar, a play button, and a volume icon. The video is currently at 02:32 / 04:18. The video player also shows a chapter title 'Chapter 6: Step One: Centralize Video'.

# BRING VIDEO LEARNING INTO ENTERPRISE WORKFLOWS

Vbrick allows video to surface directly inside enterprise platforms, enabling training and development at the moment it's needed: during onboarding, while completing tasks, or as part of operational workflows.

*Embed Vbrick video into learning and workflow experiences across enterprise platforms like ServiceNow Internal Learning Content, Tasks, and Journeys in Employee Center Pro*

## DESIGNED FOR ENTERPRISE SCALE

- Centralized governance, roles, permissions, and enterprise-grade security across platforms to control content publishing and viewing
- Accessible learning experiences with captions, transcripts, and multi-language playback
- Playback and completion controls for required training, including restricted forward seeking and saved progress across sessions
- Unified visibility into video engagement and completion across LMS and enterprise platforms
- AI-powered features that improve comprehension, understanding, and accessibility – right within the video player

## TURN VIDEO INTO A SHARED LEARNING ASSET

When video moves freely across systems, learning scales faster. Employees spend less time navigating tools so they can focus on completing required training, while leaders gain clear, trustworthy insight into completion.
