

Vbrick Video Platform as a Service (VPaaS)

DEVELOP CUSTOM APPLICATIONS WITH APIS FROM THE WORLD'S LEADING ENTERPRISE VIDEO PLATFORM

Whether you're enhancing internal workflows or building the next game-changing app, Vbrick VPaaS gives developers a robust suite of APIs and SDKs that make it easy to integrate powerful video capabilities into your solutions and accelerate time to market.

USE VIDEO APIS TO ENHANCE YOUR STACK WITHOUT SLOWING DOWN

Designing complex video algorithms that meet enterprise requirements can be a heavy lift. That's where Vbrick VPaaS comes in.

Vbrick VPaaS is a cloud-native, fully extensible video platform that makes it easy for development teams to enhance internal business applications or products using a full set of developer tools and SDKs. Add live webcasts and on-demand streaming, distribution, content management, and analytics into your business environments and customer offerings at scale.

Stay focused on innovating and let Vbrick VPaaS do the rest:

- ◉ Deploy fast with Vbrick's turnkey video solutions
- ◉ Speed time-to-value with SaaS economics — no up-front investment required
- ◉ Focus on your core competencies — no complicated infrastructure to manage
- ◉ Scale easily as your needs evolve with flexible usage-based pricing
- ◉ Maximize existing investments in hardware, software, and UCaaS solutions
- ◉ Fully white-label or OEM Vbrick's VPaaS offerings

GAIN AN EDGE WITH VIDEO USING VBRICK VPaaS

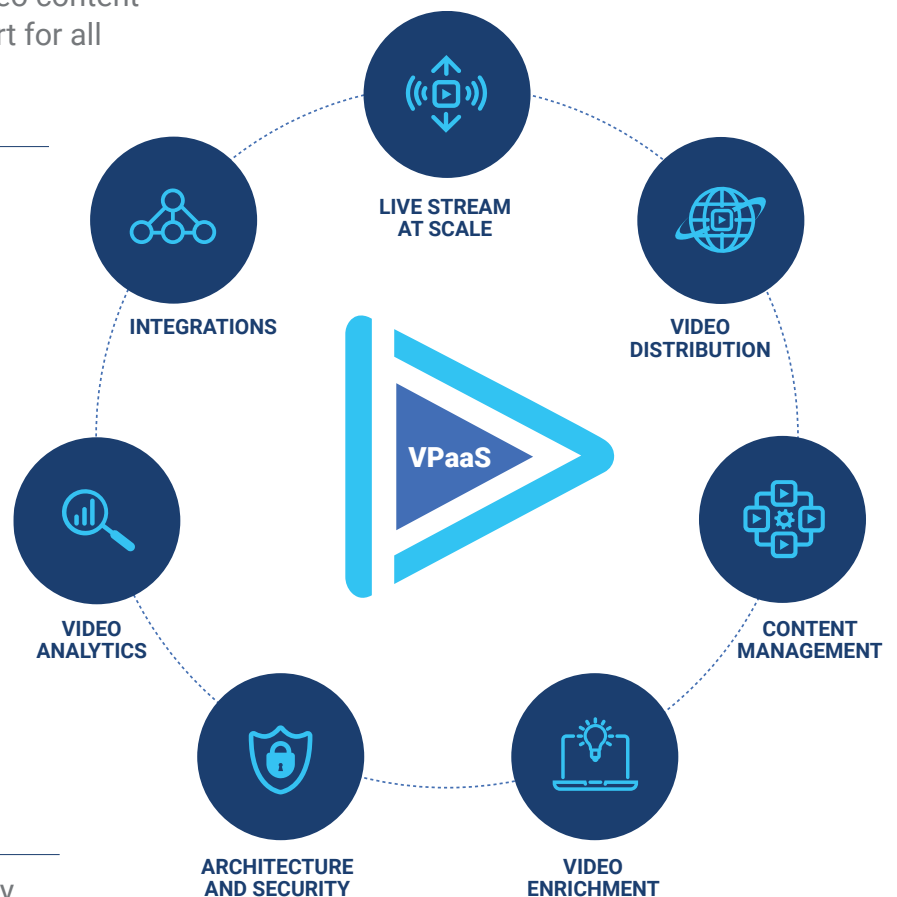

See how developers are using Vbrick VPaaS to customize and enhance internal and external end-user experiences.

	Scale Live Webcasts for 100,000+ Users	Vbrick VPaaS extends the power of Webex Webinars, ensuring thousands of global Webex customers get the most from video and stay highly engaged with their work and teams.
	Strengthen Global Partner Relationships	A leading automotive provider's global dealer network features videos that keep dealers informed of new models and important program updates – strengthening dealer/distributor relationships.
	Power Sensitive Internal Communications	A multinational investment company uses Vbrick-enabled video to power highly sensitive internal briefings while ensuring end-to-end data privacy and governance.
	Optimize Live Events	A global consumer packaged goods company integrates robust video and distribution capabilities into its customized event management platform to enhance participant and presenter experiences.
	Create New Revenue Streams With Subscription-Based Videos	A global financial services company is monetizing video as part of its subscription-based online training university.
	Enhance Customer Service Offerings	A leading communications company utilizes Vbrick VPaaS to optimize its customer service portal by embedding video directly into topic workflows, supporting both personnel and end-customers and boosting accessibility with multi-language subtitles.
	Bolster Learning Management Platforms	A U.S. government agency integrates video into its learning management system (LMS) to speed onboarding, ensure compliance, and deliver continuous education opportunities.
	Deliver Just-in-Time Video Training	A global media and entertainment company uses Vbrick VPaaS to distribute and manage on-the-job training videos to every employee, every day as they begin their shifts.

ONE VIDEO PLATFORM FOR ALL YOUR DEVELOPMENT NEEDS

See why the world's largest enterprise organizations and highly regulated government agencies trust Vbrick to power their mission-critical video infrastructure.

- ◉ **Live Webcasting:** Build high-quality live video broadcasting – capable of reaching tens of thousands of people without compromising performance – into your application
- ◉ **Global Distribution With Infinite Scalability:** Deliver live video and playback to hundreds of thousands of users simultaneously with Vbrick's industry-leading distribution capabilities – regardless of viewer location or device
- ◉ **Simplified, Centralized Content Management:** Upload videos and metadata from third-party systems and simplify video search and discovery
- ◉ **Automatic Transcoding:** Transcode video content from multiple sources, including support for all popular video platforms (i.e., Webex, Microsoft Teams, Zoom)
- ◉ **Best-in-Class Security:** Keep video assets private and secure with end-to-end governance, including SAML and JWT-based SSO
- ◉ **Content Enrichment:** Translate and transcribe video into 48+ languages in real-time to enhance accessibility
- ◉ **Deep Analytics:** Integrate user-level engagement and analytics directly into your applications
- ◉ **Broad Integrations:** Future-proof your offerings and deliver maximum flexibility to support end-user growth and change
- ◉ **Rich and Flexible Business Logic:** Easily build on top of existing roles, access controls, and pre-integrated video AI
