

# Securely Stream, Record, and Store Video Communications at Scale

WITH PEXIP AND VBRICK, YOU'RE IN CONTROL

Video is a powerful enterprise enabler. But without proper security protections in place, video content can expose sensitive data and introduce risk. As an organization that handles highly confidential or classified information, the security of your virtual meeting platform is paramount.

Pexip's purpose-built communications platform powers secure, frictionless video meetings. Vbrick's cloud-based, end-to-end enterprise video platform (EVP) helps businesses easily capture, securely manage, and efficiently distribute video content. Through our integrated partnership, your enterprise can seamlessly and securely extend the value of video, and communicate with confidence.

## BENEFITS OF THE VBRICK & PEXIP PLATFORMS

### Protect Your Data, Maintain Control, and Remain Compliant

- ◉ Host virtual meetings in a highly secure, private meeting environment
- ◉ Maintain end-to-end control of your call detail records (CDRs), meeting details, and metadata with advanced governance, compliance, and access controls aligned with a Zero Trust architecture
- ◉ Easily record and securely store videos using AES 256-bit encryption in compliance with data sovereignty laws and regulations
- ◉ Track analytics at the user level to drive accountability and ensure compliance

### Connect and Engage Audiences Wherever They Are

- ◉ Live-stream video at scale to reach audiences of any size with perfect video quality for every user, every time
- ◉ Manage global capacity from a centralized, intuitive interface
- ◉ Enable effortless collaboration across systems, platforms, hybrid workers, and external partners

### Make the Most of Your Enterprise Video Assets

- ◉ Organize video recordings by playlist, category, or channel to ease content management
- ◉ Easily find and access relevant on-demand videos with advanced search
- ◉ Support user-generated content, video editing, and recording from webcam and screenshare
- ◉ Improve accessibility with transcription and translation enrichment

### Work Flexibly Using Your Organization's Preferred Tools

- ◉ Seamlessly integrate video experiences into familiar workflows and applications, including Microsoft Teams and Google Meet
- ◉ Use multiple video sources to broadcast to tens of thousands of people using many different devices
- ◉ Deploy in a variety of ways, such as on-premises, in your preferred cloud solution, a private cloud, or a hybrid combination
- ◉ Scale as your needs change over time with flexible, consumption-based pricing

## HOW IT WORKS

Vbrick's secure recording plug-in can be added to your Pexip meetings to capture archives with a single click. The recorded files are stored in your Vbrick EVP and benefit from the built-in security capabilities, including encryption, governance, access permissions, and retention policies, as well as AI-powered search, translations, and transcriptions.

## ABOUT PEXIP

Pexip is a video communication platform that empowers large enterprises and public sector organizations to transform their interactions with video. Pexip's unique core technology provides simplified collaboration for connected spaces, privacy and business continuity for secure spaces, and customized connections for innovative applications of video. The solution is sold through more than 300 channel partners in 75 countries and used in 190 countries. Pexip was listed on the Oslo stock exchange in May 2020.

## ABOUT VBRICK

Vbrick Enterprise Video Platform (EVP) unifies live streaming, enterprise content delivery network (eCDN), video content management, and video production, capture, and enrichment. The world's most recognized brands adopt Vbrick to overcome network complexity and risk to meet critical video needs from CEO townhalls to onboarding sessions and to support innovative uses of on-demand recorded videos. Vbrick solutions integrate with and complement unified communications systems and provide the analytics and intelligence to maximize return on video investments.
